Mark,
You probably mean Jim Holler.
Larry Cseh was the coordinator/point man.

I work with Lora Werner and Dr Karl Markiewicz here in the EPA Region 3 office.
They are with ATSDR and stationed here with us.

Karl and I are both curious about what you came up with (Lora likely too but she is not in yet).
Could we have a conference call today to discuss your work?

Thanks,
Jack

Thanks. I've already been in touch with Jeff Hollar at ATSDR. Please let us know if we can help.

Best wishes,
Mark

Mark,

ATSDR derived the number and EPA stated we support it. .

I can provide contact info for ATSDR...

EX. 6 - Personal Privacy

Dear Dr. Matlock,

Please see the string below.

Ex. 5 - Deliberative

Ex. 5 - Deliberative

he asked whether Region III was involved in the derivation/coordination of the 1 mg/L value the State of WV is using. Did ATSDR or EPA Region III derive the value?

Thanks!

Hi Mark. To my knowledge, ERT was not involved in the emergency response. USEPA Region III office was contacted by WVDEP and were involved in a support function within the response. The contact for EPA is Dennis Matlock.

Out of curiosity, I tried to find some tox info on the MCHM. Not much out there. What was the number you generated as a result of your exercise (again, curiosity)?

Happy New Year

David/Marc,

As an exercise,

Ex. 5 - Deliberative

Ex. 5 - Deliberative

Ex. 5 - Deliberative

He asked whether the
USEPA was asked to develop a drinking water value - I was thinking it would have probably gone to ERT.
Was there any inquiry from WVa?

I know the ATSDR/CDC derived a 1 mg/L value based on a single acute rat LD50.

Thanks,
Mark
